

before you imprint...

In today's modern albums, imprinting has fallen by the wayside as more and more people prefer to incorporate names, dates and other personalization into their actual page designs since it allows for a wider range of styles and the ability to match personalization to the theme or feel of the individual page designs.

In following with this trend, many of Finao's cover upgrades like canvas covers, Armour, ICE, Magical Mystery Glass and many of our textured leathers are not compatible with the imprinting option.

There are still some materials that we have, however, that will allow cover imprinting for those wanting to display a more classic and traditional look. Make sure you are selecting an appropriate material if you want cover imprinting.

Studio imprinting on the inside front cover of your album with our standard imprinting fonts or your custom designed studio die is also another possibility.

If you are ordering a studio sample, all studio samples will be imprinted with "studio sample" on the inside back cover of the album.

A WORD OF CAUTION ON IMPRINTING

If you choose an imprinting option, ALL imprinting options are typeset EXACTLY as typed on the order form. If you type your imprint in all caps it will be imprinted in all caps. You have been warned.

All cover imprinting is limited to 30 characters per line. Studio imprinting is limited to 35 characters per line. Not all fonts and font sizes will work on all album sizes. ALL imprinting must have a half inch to either side of the imprint as a safety margin. Select your font style and size carefully depending on your album size.

Special characters for imprinting are limited and may not be available. If you want to use a special, non-alphabet character, contact customer service to check on its availability BEFORE you place your order or delays in your order can occur.

MATERIALS THAT ALLOW IMPRINTING

Leathers

- All That Jazz
- Basics
- Colours
- select Mixed Bag
 - CU29
 - Saturday Night Special

imprinting foils

Finao uses premium heat set imprinting foils and they are available on most of our cover materials (see individual cover materials pages for more info.) There is no foil involved with blind (clear) embossing. Please note, imprinting foil colors may vary from shades shown on the web.
